INTEGRATED
LABEL/CARDS

RFID APPLICATION

MANY CONFIGURATIONS

CONTINUOUS CONVERTING MODULE

The **DIGILINE 520** is a converting equipment dedicated to converting applications for marketing and transpromotional productions.

Starting from a roll, the **DIGILINE 520** converts pre-printed documents into high added value documents.

DIGILINE 520

CONVERTING LINE

INTEGRATED LABELS AND PERSONNALISATION

The **DIGILINE 520** is a modular equipment which makes a very large number of configurations possible thanks to numerous options.

PINFEED OR PINLESS

Allows the application of a self-adhesive film or back/front adhesive film for the production of integrated labels, Sesam labels, magnet, integrated plastic cards, envelops, varnishes, scratch-off or holograms.

ONLINE OR OFFLINE

The equipment can run either in off-line mode, powered by an unwinder or in on-line mode, directly connected to a digital printing device.
